Work History

Software Developer   04/2019
Freelancer–Lagos, Nigeria

- Designed and implemented a Food Ordering System. An Ecommerce website that helps students in Landmark University to place order for meals at the cafeteria and groceries from the store. I developed for a final year students project.
- Implemented the Apriori Algorithm to help with market basket analysis.
- Tested programs and databases to identify issues and make necessary modifications.
- Created, delivered and maintained scalable system architecture to support high-availability Internet site with various internal applications.
- Adjusted software parameters to boost performance and incorporate new features for meeting customer needs.

Software Developer   09/2019 to 10/2019
Personal/Undergraduate Projects – Omu-Aran, Lagos

- Redesigned and Implemented the student portal from a basic and static site to a responsive site with more functionality added.
- A team of two designed using Adobe XD and implemented using HTML, CSS, JavaScript, AJAX, PHP and SQL.
- Used the portal as a learning base to build up my skills in Back-End Development.

Software Developer   08/2018
Personal/Undergraduate Projects – Ikeja, Lagos

- Redesigned SIAO website from a static webpage to a responsive website.
- Used HTML, CSS and JavaScript for implementation.

Programming Languages and Frameworks

- HTML & CSS
- JAVASCRIPT (jQuery, React)
- PHP
- PYTHON
